

Nombres:

ALEJANDRO PABLO

Apellidos:

SABAT KIRKWOOD

Contacto (Opcional):

psabat@uchile.cl

Título Profesional o Grado Académico (incluya el año de obtención):

LICENCIADO EN CIENCIAS C/M EN BIOLOGÍA, UNIVERSIDAD DE CHILE 1990.

Estudios de Postgrado o Especialización (institución donde lo obtuvo y año de obtención):

MAGISTER EN CIENCIAS BIOLÓGICAS UNIVERSIDAD DE CHILE 1993.

DOCTOR EN CIENCIAS C/M EN BIOLOGÍA, UNIVERSIDAD DE CHILE 1998.

Actividad Actual e Institución en la cual trabaja:

PROFESOR TITULAR DE LA UNIVERSIDAD DE CHILE. DEPARTAMENTO DE CIENCIAS ECOLÓGICAS, FACULTAD DE CIENCIAS. JEFE DE LA CARRERA BIÓLOGO C/M EN MEDIO AMBIENTE.

Reseña de su actividad laboral actual:

Área de Investigación: Ecofisiología Animal

He centrado mi investigación en el análisis de los mecanismos fisiológicos que determinan el patrón de distribución y la conducta de alimentación en vertebrados. Los estudios han sido centrados en las diferencias intra e inter específicas así como en los cambios ontogenéticos y estacionales. Los estudios han incluido aves, mamíferos, reptiles y anfibios. He focalizado mis estudios en las relaciones causales entre la

plasticidad fisiológica y la flexibilidad ecológica usando la fisiología osmorregulatoria y digestiva como restricciones fisiológicas potenciales. Para abordar estos problemas, en el laboratorio utilizamos diversas herramientas, desde el análisis de isótopos estables (e.g., $\delta^{13}\text{C}$, $\delta^{15}\text{N}$), hasta determinación de capacidades bioquímicas (e.g., enzimas digestivas y metabólicas), sistémicas (e.g., función renal) y organismicas (e.g., metabolismo energético).
